Registered users are now able to submit a video game guide using the [Submit a Gamer Guide](#) link in their user menus.

All you need to submit a Gamer Guide is a title, the guide itself, and a few pictures to top it off.

Gamer Guides can be tips, cheats, or full-out-step-by-step tutorials. They should contain information to help your fellow gamers be successful.

GamerGoals users may also rate Gamer Guides on how much they helped, which provides a guide in itself as to which ones are good and which are bad.
