**My coworker and friend of mine, Tim Frisch, and I were pondering at work one day about [Facebook](#). We came up with the idea of using shortcuts of common computer programs and various Windows icons to produce one of those Facebook Friend Foto images that have been popping up on our news feeds for the past few months. It seems that nobody has thought of doing this before, [so we gave it a shot.](#)**

**To [download](#) this image, right click on it and click "Save Image As". Save it as "facebook-friend-foto". Then upload it to your profile pictures album in Facebook. Tag 27 of your friends and tag yourself as the "My Computer" icon.**
